Organized
Creativity
Teamwork
Meeting deadlines
Critical thinking

Language

French
Arabic
English

About me

A student of MNU Faculty of Medicine, 21 years old, and I am very fond of healthcare and the complexity of the human body. This is a rare combination in my profile as I am also an aspiring medical professional with strong skills in technology as supported by Cisco and Microsoft certification in IT management.

I excel in balancing the analytical and empathetic components of the two disciplines to be innovative. As a professional, I am intended to become a General Surgery Surgeon, and I consider it to be the ultimate demonstration of medical skills.

Finally, with the help of my future wife, I would strive to attain higher levels of surgical training in the UK and the US to merge international standards with self-fulfillment.

Experience

Medical Student & Researcher - Till now

- FIFA Diploma in Sports Injuries
- Received a Certificate of Quality and Experience from Lubna Pharmacies as a competent medical professional.
- Obtained numerous recommendations and nominations from attending physicians during third and fourth-year clinical rounds.
- Honored with a Distinguished Doctor certificate for my role during the COVID-19 pandemic in 2021.
- Received a Certificate of Quality and Appreciation from Najida Academy for Scientific Research.
- Hold an Ijazah (authorized certification) for memorizing the Holy Quran from Ashab Al-Maymanah Academy.
- attended numerous medical conferences and seminars across various specialties.
